NOTES

The turnaround time refers to the maximum number of working days from receipt of sample and reporting results.

\$ We are a United Kingdom Accreditation Services (UKAS) accredited laboratory, and these tests which are marked with '\$' are accredited to the internationally recognised ISO/IEC 17025 standard for laboratory competence.

✕ In order to ensure that we have the reagents in stock, a ten working-day turnaround time is quoted, however we aim to test within five working days.

***** Other smears may be available on request.
